I should have noted that this is the sampling being coordinated by BP. I believe the EPA is doing some additional testing.

Thanks,  
James

Bonnie,

Please see the attached daily summary results of air and water quality testing for more details including maps of the sample locations.

Daily Air Monitoring Activities

792 measurements made (monitoring for VOC, H2S, benzene, SO2, and crude oil odors) along the coast between Venice, LA and Pensacola, FL.

Daily Water Monitoring Activities

12 sampling locations along the Gulf Coast from Venice, LA to Navarre, FL -- samples to be analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), gasoline range organic compounds (GRO), diesel range organic compounds (DRO), oil range organic compounds (ORO), Target Analyte List (TAL) metals, and mercury.

We are also in the process of approving a daily summary slide with these activities that will be provided to our Public Information Officer and then up to the JIC.

Thanks,  
James

James -

Please close the loop with Bonnie on this.

Thanks

Mike

Hi Mike or Gary,  
I'm Resource Unit Leader in Area Command and in charge of gathering information for building the daily Metrics. One thing asked for in the 10:00 briefing yesterday was a chart on the air and water testing going on. I was wondering if you could direct me to the person(s) who could provide me the number of air and water tests being done daily.
